

Follow the steps below for a seamless experience!

- STEP 1** Purchase your SIM cards from [www.mateconxxion.com.au](http://www.mateconxxion.com.au) so you can activate your customer on the spot and get your IBO points ASAP!
- STEP 2** Make sure your customer is using a mobile device that is compatible and unlocked. **We cannot unlock devices from another provider! Please make sure the handset you are using is unlocked before activating your mobile service.** Give your customer the designated Conxxion IBO store link so your points will be added to the order as soon as your customer is active.
- STEP 3** Discuss the plans with your customer and work out what is best and suits their needs. If you have any questions, remember your dedicated Conxxion support team is on hand to help and can be called Monday to Friday between 9am-7.30pm & from 9am-7pm on a Saturday.
- STEP 4** Once your customer has selected the plan that suits them, they will follow the steps on the sales form and complete the sign up. It is important at this stage they select whether you have given them a SIM card. This will speed up the activation process and make it a smoother transition for your customer!
- STEP 5** Once your customer has completed the sign up, they will receive some important information from MATE, including the new account number (or MATE code as we like to call it). They will require this along with some other information about their existing mobile service when activating the SIM card. Once your account is created your customer will go to the 'activate your SIM' page on the website.
- STEP 6** It is important that if your customer is transferring (porting) an existing mobile number, **DO NOT PUT THE MATE SIM CARD IN THE PHONE YET!** The existing SIM card with the current provider will continue to work even after this activation form is submitted. To make sure the activation goes smoothly, the customer will now need:
1. The MATE account number (or what we like to call your MATE code);
  2. The new MATE SIM card;
  3. The existing mobile provider's account number (if the customer is currently on a postpaid mobile plan and bringing the mobile number to MATE)
- STEP 7** Your customer will now follow the activation steps and instructions. Once this has been completed, they will receive an SMS to authorise the port from the current provider to MATE. It is important that they click to accept the porting process.
- STEP 8** When your current mobile service has stopped working, it is now time to put in your MATE SIM card and enjoy MATE's award winning service on Australia's trusted network!
